CONFIDENTIAL. This is an official file of the North Carolina State Bureau of Investigation. To make public or reveal the contents thereof to any unauthorized person is a violation of the General Statutes of North Carolina.

RESULTS OF ANALYSIS (CONTINUED):

The other hair was found to be microscopically similar to the head hair of Viktor Gunnarson. However, due to the limited nature of this hair, no conclusion could be reached as to its origin.

Ten hairs were submitted to LabCorp for PCR analysis on October 18, 1995. Results received were; "Insufficient Deoxyribonucleic acid (DNA) was isolated from the hairs in the item listed above to characterize through Polymerase chain reaction (PCR) Analysis".

DISPOSITION OF EVIDENCE:

Items ME-1, hair from Item #49, and Item #55 were transferred to S/A David Glasgow of the FBI on August 19, 1995.

The remainder of the evidence is enclosed in the attached package and is being returned via United Parcel Service.
